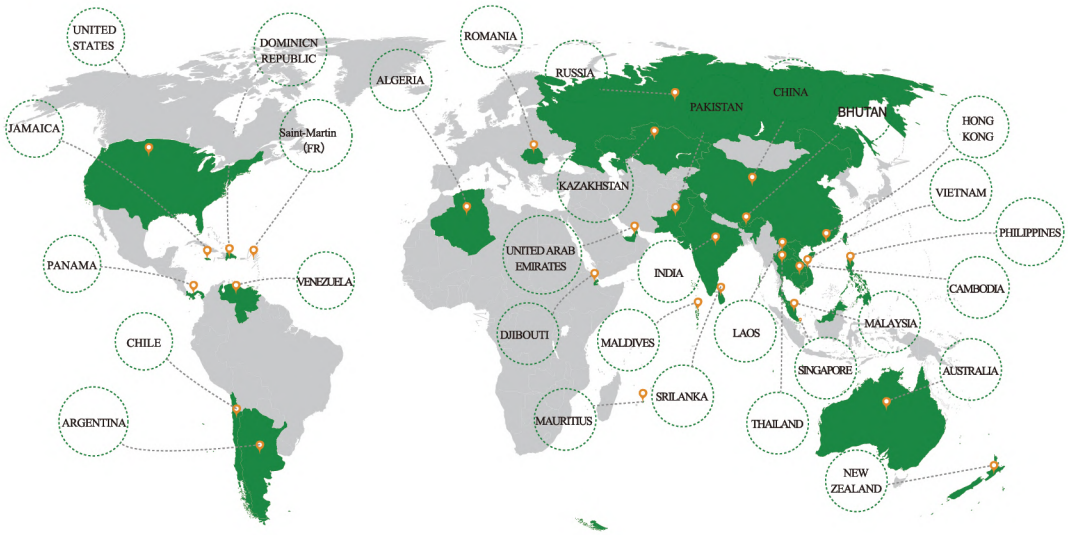
introduction ..

GETO New Material is a share listed company (stock code: SZ 300986) focusing on new-type building aluminum formwork, self-climbing platform, assembly PC components,and its business covers civil and public construction fields. The global management headquarter was set in Cuiheng New District of Zhongshan in Guangdong, the back-land of the Greater Bay Area. Our products sell well in more than 30 countries and regions around the world including China Hong Kong, China Macau, China Taiwan, Malaysia, Singapore, Philippines, India, Sri Lanka, Cambodia, UNITED Arab Emirates, Saudi Arabia, Egypt, Algeria, Dominica, Uruguay, Panama and etc.

Aluminium Formwork System

Aluminium Formwork System is a construction system for forming cast-in-place concrete structures of a building. It is also a system for scheduling and controlling the work of other construction trades such as steel reinforcement, concrete placement, and mechanical and electrical conduits. The advantages of Aluminium Formwork are that it is quick to set up, very precise, and very sturdy.

Overseas Markets..



Why Aluminium Formwork System?

Less Construction Cost.

The cost saving throughout the whole construction progress from deflect rectification, machineries, additional conventional formwork cost, time etc.

Easy Transfer

The formwork panels can be transferred to next floor through the material transfer box on the slab without using the crane after dismantling.

Excellent Quality

GETO aluminium formwork system does not require plastering as the off-the-form finish is less than 3.5mm tolerance in deflection.

Safety

It is safe enough for the construction requirement due to the strength, deflection and stability of GETO aluminium formwork system.

Speed

The wall, beam, column, slab can be casted at one time by using GETO aluminium formwork. Furthermore, our prop-head system will allow to dismantling the slab panels without removing the props. Thus, 6 days cycle is no longer a dream but a

Light Weight

The system panel is an easily handling & handheld product. All components almost can be transfered by labour through the slab transfer box during the installation, dismantling & transferring due to the light weight with 25kg/m2

Extensive Application

The aluminium panel can be used in wall, slab, column, beam, staircase, window, etc. The system can also be included in secondary structure, such as the lintel, tie column, etc.

Cycle Use.

GETO system panels are designed for strength and maximum usability. This provides the ability to reuse your existing GETO panel stock into new project designs in order to maximize value and return on investment of your GETO formwork assets.

Reliable System

With GETO's Aluminium Formwork System, brackets for wall, slab, elevator and external working platform are provided.

Environment Friendly.

By minimizing the usage of limited resource such as plywood and timber, GETO provides an environment-friendly system.
